

The Worthington

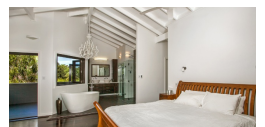

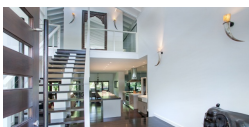

4 Bed 3 Bath

This modern custom home design features four bedrooms, 3 bathrooms, two living areas and large deck areas.

Another stunning design from Classic

The creation of this magnificent residence, as with all of Classic's homes, includes flexibility and design and has produced an outstanding result. Extra-wide hallways and entry are stand-out characteristics of this traditional home. Exceptionally large, open living areas with high, flat and cathedral ceilings enhance the appearance of the home and achieve a high level of natural light and warmth. This home incorporates modern architecture with timeless design & appeal.

Classic Building has designed a home that is both functional & spacious with every space in the home having been utilized & carefully thought about. What has been created is a home that is relaxed, welcoming & yet striking in its details.

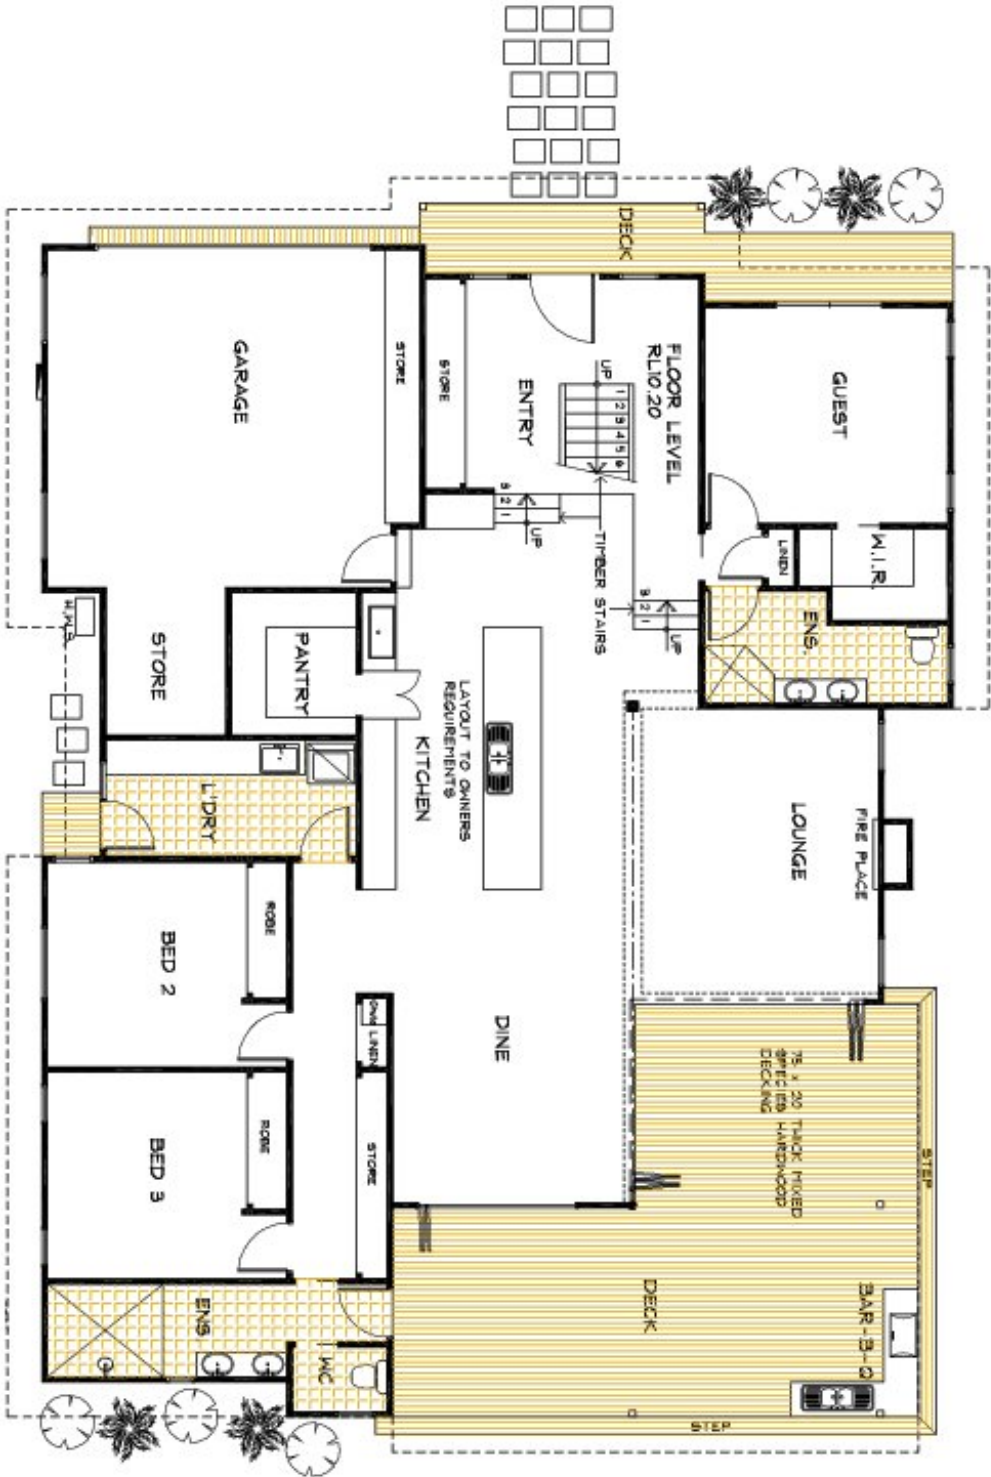

*The floorplans shown demonstrate some of the options available in terms of layout, possible size, possible number of rooms, decks and more. They are a guide, and are meant to provide you with ideas and show you possibilities. Any of the basic designs can be customised to suit any of your requirements.
